Description of Problem

#### **3.1.1 Goals and objectives**

Goal and Objectives:

- Overall goals and objectives of software, input and output description with necessary syntax, format etc are described

#### **3.1.2 Statement of scope**

- A description of the software with Size of input, bounds on input, input validation, input dependency, i/o state diagram, Major inputs, and outputs are described without regard to implementation detail.
- The scope identifies what the product is and is not, what it will and won't do, what it will and wont contain.

### **3.2 SOFTWARE CONTEXT**

- The business or product line context or application of the software is to be given

### **3.3 MAJOR CONSTRAINTS**

- Any constraints that will impact the manner in which the software is to be specified, designed, implemented or tested are noted here.

### **3.4 METHODOLOGIES OF PROBLEM SOLVING AND EFFICIENCY ISSUES**

- The single problem can be solved by different solutions. This considers the performance parameters for each approach. Thus considers the efficiency issues.

### **3.5 SCENARIO IN WHICH MULTI-CORE, EMBEDDED AND DISTRIBUTED COMPUTING USED**

Explain the scenario in which multi-core, embedded and distributed computing methodology can be applied.
