

Amrutvahini College of Engineering, Sangamner

Department of Computer Engineering

Academic Year 2024-2025

Project Title:

Project title should reflect the overall objective of the project undertaken. Avoid using abbreviations, punctuation marks in the project title.

Key Words:

Keywords should be in Alphabetical order and separated by ; (semicolon). Minimum 5 and maximum 10 Keywords.

Problem Definition:

The definition is to include all that is to be done and is to be put up in the final software and / or Hardware (product) that is to be generated from the years work (User's point of view).

Objectives:

Project objectives are what you plan to achieve by the end of your project. This might include deliverables and assets, or more intangible objectives like increasing productivity or motivation. Your project objectives should be attainable, time-bound, specific goals you can measure at the end of your project.

Literature Survey (List of references only):

The purpose of the literature survey is to identify information relevant to project work and the potential and known impacts of it within the project area. This section should include a comprehensive report of current market survey done with respect to problem.

Note: This should include the list of books, magazines, research papers, web links etc referred by the students.

Abstract:

An abstract is a summary of a project. It provides readers with the main idea or essence of the project/manuscript/article swiftly, allowing them to determine whether to read the full study; it prepares readers to follow the comprehensive information, statistical analysis, and assertions in the full study; and, later, it helps users recollect important elements from the study. A minimum of 100 words briefing the topic in consideration.

Current Market Survey:

Include study of similar systems available, if any along with their pros and cons. Identify those areas where there is an absence or scarcity.

Scope of the Project:

The project scope defines the boundaries of the project that is, what is included and what is not.

Contribution to Society:

Define how your project will contribute or have impact on environment, society, industry, and so on.

Outcome of the Project:

Project outcomes are results that occur from creating your product or service. They are the changes in policies, people and communities that you aim to achieve with your work. Outcomes may be positive or negative and sometimes occur unintentionally. These statements are specific and measurable, letting you know when you accomplished your goal. While they lead to creations, project outcomes focus more on the broad mission.
